A-TRACK

The Complete Solution for Asset Management

Asset Tracking can be difficult, especially when you do not know where they are located. More often than not, Asset Counts become very time-consuming chores; and yet the Accuracy is often questionable. The time and effort spent could be better utilized in other more productive areas.

In the past, companies typically feel that too much time and effort is being spent to ensure accurate assets reporting. **A-TRACK** is the solution for all your Asset Management and Tracking needs.

A-TRACK is a web-based system that is designed for Microsoft Windows®. Anytime, anywhere - Accessible by users via the Internet and Intranet, **A-TRACK** offers true ease-of-use; ease-of-maintenance and regular upgrades.

THE ADVANTAGES

A-TRACK enables all Fixed Assets transactions to be captured as-it-happens. Track details such as:

- Asset Number, Description, Serial No, etc
- Transfers & Assignments to users /locations
- Date of Purchase, Cost Centres
- Warranty and write-off
- Plus options for additional information

A-TRACK offers the following key advantages:

- Increased Accuracy in Reporting
- Easy and accurate identification of assets
- Eliminates the paper-and-pen processes
- Enhanced Visibility of Assets
- Reduced errors
- Reduced time and operational costs
- Security Control

FLEXIBLE ASSETS-TAGGING METHODS

A-TRACK interfaces with and accepts data input from two main methods of identification - Barcode and RFID.

It is designed for .NET environment; therefore Asset Count can be done via your very own PDAs!

MINIMUM SYSTEM REQUIREMENTS

For Web Server

Microsoft Windows 2000 with .net Framework

- SQL Windows Server with SP3a
- Internet Explorer 6.0 and above
- Microsoft .Net Framework 1.1 and above

For PC

• Microsoft Windows 98SE

For Handheld / PDA

- Microsoft Pocket PC2002 with ID Laser Scanner
- Intel Xscale Processor

INTEGRATION OPTIONS

A-TRACK functions as an independent standalone system. At the same time, it also gives users the option to interface with existing ERP Systems such as SAP's FICO. This means no double entries!

For customers that already have an Asset Management System in place, **A-TRACK** can be customized for Mobile Asset Count to work on your PDAs.
